Smart centre comes into operation

Facility with integrated system to improve management of PJ, engagement with stakeholders

By **BRENDA CH'NG**
brenda@thestar.com.my

PETALING Jaya's smart centre is finally up and running to better develop and manage the city.

The centre, which is located beside the Petaling Jaya City Council (MBPJ) headquarters along Jalan Yong Shook Lin, is a data hub which can be accessed by everyone, including the public as well as organisations and agencies.

The building houses information and communication technology infrastructure along with 54 dashboards and 15 applications to connect the people to the city council.

MBPJ is working with Celcom Axiata Bhd's 5G technology to increase the effectiveness of security and monitoring through CCTV and traffic surveillance, among others.

"To-date we have already completed and published 25 dashboards while another 29 are under the programming, formatting and designing stage," said Petaling Jaya mayor Datuk Mohd Sayuthi Bakar at the centre's launch.

Among the dashboards which are live and running include

to 17/3/2020 msy

Smart Mobility for the Petaling Jaya free bus, Smart Society for the PJKita programme and Smart Digital City Information Modelling.

At the smart centre, officers can see three-dimensional (3D) mapping of the city down to the number of trees and where they are planted.

It also has an integrated system for complaints, waste management, licensing and enforcement as well as cleanliness, making everyday tasks more efficient for the officers involved.

For example, the integrated system will allow officers to produce reports or take action much faster than before.

Even for planning permits, what used to take about 200 days will now be cut down to half that time frame.

It is also able to stimulate floods at flood-prone areas or even project the possible traffic impact of flooding for future developments.

"All this is connecting the city to the Internet of Things (IOT) which makes handling issues like traffic congestion, cleanliness, safety and even natural disasters easier and faster," said Sayuthi.

Apart from this, the smart centre will be used to store Petaling

Pegawai kerajaan disyaki dijangkiti Covid-19 bekerja di rumah

SHAH ALAM - Pegawai kerajaan yang disyaki dijangkiti koronavirus (Covid-19) diberikan pelepasan khas untuk bekerja di rumah bertujuan mengurangkan risiko penularan penyakit Covid-19.

Ketua Pengarah Perkhidmatan Awam, Datuk Mohd Khairul Adib Abd Rahman berkata, kerajaan bersetuju untuk memperuntukkan pelepasan khas itu bagi membolehkan ketua jabatan mengurus pegawai terbabit.

Sehubungan itu, pihaknya mengeluarkan garis panduan pengendalian isu berhubung penularan jangkitan wabak Covid-19 di premis kerajaan berkuatkuasa semalam.

"Ini terpakai khusus untuk menangani penularan wabak Covid-19 bagi tempoh sehingga negara dimaklumkan bebas Covid-19 oleh pihak berkenaan atau kerajaan. Tertakluk kepada penerimaan pihak berkuasa masing-masing.

"Garis panduan ini keseluruhannya dipanjangkan kepada semua Perkhidmatan Awam Negeri, Pihak Berkuasa Kanun dan Pihak Berkuasa Tempatan," katanya dalam ke-

nyataan di sini semalam.

Garis panduan tersebut terbahagi kepada tiga bahagian iaitu kesejahteraan pegawai, pengendalian kebersihan di premis kerajaan dan penguurusan pelanggan.

Kementerian atau jabatan yang dikesan mempunyai kes positif Covid-19 perlu melakukan penutupan sementara premis bagi tujuan pembersihan dan disinfeksi.

Garis panduan tersebut turut menerangkan pelepasan kerja bagi pegawai yang disahkan positif Covid-19 mengikut beberapa situasi.
