Part of Jalan Universiti, Petaling Jaya was closed to motorists following a burst pipe incident on Wednesday.

Air Selangor contractors resurfacing the affected area along Jalan Universiti in Petaling Jaya after completing repair works on the pipe yesterday.

# Sinkhole on Jalan Universiti repaired

Ageing pipes contribute to infrastructure problems in Selangor, says assemblyman

MOTORISTS can heave a sigh of relief now that the sinkhole along Jalan Universiti in Petaling Jaya has been fixed.

The road has been reopened to traffic.

The sinkhole happened due to a burst pipe.

Bukit Gasing assemblyman Rajiv Rishyakaran said burst pipe incidents were not new in Selangor and occurred daily in different parts of the state.

"Every week, at least 50 of such cases are reported. This is because

our pipes are old and need to be changed," he said, adding that most of the pipes had a 25 to 30-year lifespan.

Rajiv said changing old pipes would be a costly affair for the Selangor government as there were about 6,000km of pipes that needed to be replaced.

"Consumers must be prepared to pay higher water tariff if they want the pipes to be changed," he said.

On Wednesday, a car plunged into a sinkhole after an underground pipe burst around 5am, causing traffic congestion opposite the *Sin Chew Daily* office as resi-

dents headed out for work.

Repair works to fix the burst pipe and sinkhole continued throughout the day after Air Selangor closed part of the road and diverted motorists to Jalan 17/41.

During the incident, households and business operators in Section 11, 16, 17, 19, 21, 22 and SS2 experienced dry taps for almost 24 hours.

Water supply was fully restored at 6am yesterday.

*StarMetro* visited the site yesterday morning and saw Air Selangor contractors resurfacing the road after addressing the sinkhole problem.

At 11am yesterday, part of Jalan Universiti was still closed to motorists with workers busy resurfacing the large area.

A similar incident took place last year on the same stretch, leaving residents worried that the incident may happen again.

Several road users said they would avoid using the road to get to Section 17 as much as possible.

"It is so scary. You do not know when the pipes will burst again," said Fanny Tan who used this street to get to her regular coffee shop in Section 17.

Tan said she would opt for alternative roads and would avoid

driving along this stretch as much as possible.

Others blamed the growing development in the area as a contributing factor to the sinkhole occurrence.

"There are many large lorries and trucks using the road daily. These vehicles are damaging our roads," said Andy Wong.

Air Selangor told *StarMetro* that the old asbestos cement pipes could have broken due to high water pressure or heat. Contractors at the site said the water pressure would be monitored continuously to ensure they were stable following the repair works.

## 842 aduan air berbau sah selamat digunakan pengguna

Oleh MOHD. YUNUS YAKKUB

**SHAH ALAM** - Air Selangor Sdn. Bhd., (Air Selangor) mengesahkan sebanyak 842 daripada 952 aduan air berbau di 18 buah kawasan di negeri ini selamat digunakan oleh pengguna.

Ketua Jabatan Perhubungan Pelanggan dan Komunikasi Air Selangor, Abdul Raof Ahmad berkata, kesemua aduan tersebut diterima pihaknya bermula 29 September lalu hingga semalam.

Menurutnya, berdasarkan ujian in-situ (ujian pensampelan di tapak) dilakukan, pihaknya mendapati air dibekalkan sela-

mat digunakan dan memenuhi piawalan kualiti air Kementerian Kesihatan (KKM).

"Pemeriksaan turut dilakukan terhadap sistem agihan dan pihak kami telah mencuci sembilan kolam perkhidmatan.

"Pemantauan dan tindakan berterusan akan dilakukan sehingga baki 110 kes aduan air berbau tiada lagi," katanya dalam kenyataan di sini semalam.

Antara kawasan aduan meliputi Aman Putra, Bukit Puchong, Kota Warisan, Putra Impiana, Putra Perdana, Putrajaya Presint 11, Salak Tinggi, Taman Intan Baiduri dan Taman Marwar Bandar Baru Salak Tinggi

di Sepang. Selain itu, di Petaling melibatkan kawasan Puchong Intan, Puchong Perdana, Puchong Prima, Puchong Utama, Saujana Puchong dan Seri Kembangan.

Aduan juga diterima di kawasan Bangi Seksyen 3,4,5,7,9 bagi Hulu Langat, Saujana Putra di Kuala Langat serta USJ 3, 6, 5, 16.

Abdul Raof berkata, pihaknya mengambil serius berhubung aduan itu dan pelanggan dinasihatkan menghubungi di talian 15300 atau WhatsApp ke nombor 019-2800919/019-2816793 jika mengalami masalah bekalan air berbau.

DUA petugas Air Selangor melakukan kerja-kerja mencuci sistem perpaipan di sekitar negeri itu baru-baru ini.
